

Dr Adam Carnall

<https://accarnall.github.io> - adam.carnall@ed.ac.uk

Institute for Astronomy, Edinburgh University, Royal Observatory Edinburgh, EH9 3HJ, UK

ACADEMIC POSITIONS

2023–present **Chancellor’s Fellow** – Edinburgh University, UK
 2021 – 2024 **Leverhulme Early Career Fellow** – Edinburgh University, UK
 2019 – 2021 **Postdoctoral Research Assistant** – Edinburgh University, UK

EDUCATION

2015 – 2019 **PhD Astrophysics** – Edinburgh University, UK
 The star-formation histories of massive quiescent galaxies
 2011 – 2015 **Masters in Physics and Astronomy** – Durham University, UK
 First class honours (final mark 82%)
 2009 – 2011 **A-Levels** – Thirsk School and Sixth Form College
 A*A*A*A* in Physics, Chemistry, Maths and Further Maths

PUBLICATION STATISTICS

Number of refereed journal publications: 84 (of which 10 as first author)
 h -index: 46 (via [NASA ADS](#) 12/03/2026) – 8569 total citations (of which 2497 as first author)

FUNDING AWARDED

2024 – 2029 **UKRI Frontier Research Grant** – (UK replacement for ERC Starting Grant)
 “The Origins of Massive Galaxies” (£1.2M)
 2021 – 2024 **Leverhulme Early Career Fellowship**
 “The Metal Contents of Massive Galaxies Across Cosmic Time” (£100k)

SUPERVISION EXPERIENCE

2024–present Struan Stevenson – PhD Student
 2024–present Ho-Hin Leung – Postdoctoral Researcher
 2025–present Elizabeth Taylor – Postdoctoral Researcher

TELESCOPE TIME AWARDED (PI)

2023 **James Webb Space Telescope** – Programme ID: 3543 (72 hours; £5.8M)
 EXCELS: The early extragalactic continuum and emission line survey
 2021 **James Webb Space Telescope** – Programme ID: 2285 (8 hours; £610,000)
 A massive quiescent galaxy at $z = 4.657$
 2019 **ESO Very Large Telescope** – Programme ID: 0104.B-0885 (64 hours; £560,000)
 The stellar mass-metallicity relation for massive quiescent galaxies at $1.0 < z < 1.5$

PUBLICLY RELEASED SOFTWARE

2018 **BAGPIPES** – Python software for galaxy spectral modelling and fitting
<https://github.com/ACCarnall/bagpipes> – used in [546 publications](#) to date
 2017 **SPECTRES** – Python software for resampling spectral data and associated uncertainties
<https://github.com/ACCarnall/spectres> – used in [262 publications](#) to date
